

Keep It Simple Feeding Chart

For Hand-Feeding Applications Only

Dilute Earth Juice concentrates with water according to the following tables.

1 tsp (teaspoon) = 5 ml • Tbsp (Tablespoon) = 15 ml • 1 oz (ounce) = 30 ml • Gal = 3.785 L

Application rates at Tbsp (Tablespoons) per U.S. Gallon and ml (milliliters) per Liter of water.

General use rates $\frac{1}{2}$ - 3 Tbsp per gallon of water.

Use with each watering (feeding). For slower growth and/or low light levels use every 2-4 weeks or as needed.

Formulas can be combined and used together.

Always Shake Formulas Vigorously Before Each Use

Formula Phase	Amazon Bloom	Earth Juice Grow		Earth Juice Bloom	
	Weeks	tsp	ml	tsp	ml
Starts	2	—	—	—	—
Vegetative	3 to 4	3.0	4.0		
Flowering	3 to 4	1.5	2.0	3.0	4.0
Ripening	1 to 2	—	—	3.0	4.0

During extended Flowering periods, if plants exhibit signs of premature yellowing, increase the use rates of Earth Juice Grow.

This chart is only intended as general guidelines and use rates may be adjusted as per individual needs.
