Cal-Mag Plus****														

FEEDSHEET TIPS

- Sediment and carbon filter or R.O. filtered water recommended for irrigation.
- If using R.O. filtered water supplement with Cal-Mag at recommended rate.
- In Coco: Every 4 weeks, regardless of age of plant, incorporate a 5 ml/gal Cal-Mag + 2 ml/gal Hydroguard flush. Water to the point of 20-30% runoff.
- In Soil: Every 4 weeks, regardless of age of plant, incorporate a 2 ml/gal Hydroguard flush. Water to the point of 20-30% runoff.
- During periods of plant stress (environmental, pest, disease, etc.) mix 10 ml/gal of Vitamino into nutrient solution.

***Do not use Hydroguard if running in chlorinated or H₂O₂ sanitized water.**

****Repeat late flowering if additional weeks are needed for late finishing crops. Remove late flowering for early finishing crops.**
